

ADDITIONAL CERTIFIED REFERENCE MATERIALS

RDC-1104

Material type
**GRANULAR
PITCH
ELECTRODES
LINING**

Certified reference material for the control of the crystallite size measured by X-Ray diffractometry

Technical information
Weight per unit: 150 g
Number of tests: 75

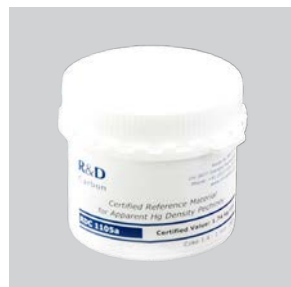

RDC-1105

Material type
**GRANULAR
PITCH
ELECTRODES
LINING**

Certified reference material for the control of the apparent density Pêchiney measured by Hg porosimetry

Technical information
Weight per unit: 180 g
Number of tests: 90

P601-P609

Material type
**GRANULAR
PITCH
ELECTRODES
LINING**

Calibration standards for impurities in coal tar pitch measured by X-Ray spectrometry

Technical information
Weight per unit: 200 g
Number of tests: 20

A501-A514

Material type
**GRANULAR
PITCH
ELECTRODES
LINING**

Calibration standards for impurities in granular carbon and electrodes measured by X-Ray spectrometry

Technical information
Weight per unit: 200 g
Number of tests: 13
