ADDITIONAL STANDARD MATERIALS

RDC-1104

RDC-1105

GRANULAR PITCH

ELECTRODES LINING

Weight per unit:

Certified reference material for the control of the crystallite size measured by X-Ray diffractometry

150 g

Material type **GRANULAR** PITCH **ELECTRODES**

Certified reference material for the control of the apparent density Péchiney measured by Hg porosimetry

Fechnical information

Weight per unit: 180 g Fechnical information Number of tests: 90

P601-P609

GRANULAR PITCH ELECTRODES

Calibration standards for impurities in coal tar pitch measured by X-Ray spectrometry

A501-A514

GRANULAR **PITCH ELECTRODES** LINING

Calibration standards for impurities in granular carbon and electrodes measured by X-Ray spectrometry

13

Weight per unit: 200 g Number of tests:

Weight per unit: 200 g Technical information Number of tests:
